Chapter 1. Getting Started

1.1 Writing a Simple C++ Program

Function

- *define*: ***ReturnType   Function-Name   (Parameter-List)   {Body}***
- *main-function*:***int _cdecl main (int argc[1],char *argv[][2], char *argv[][3]) {return 0x0;}***

Type

- *define*: **the contents of a data element、operation that are on those data**
- *say*: **v** has type **T**[4]

---

1. 命令行参数的数量(arg count) ↵

2. 命令行参数数组↵

3. 环境参数数组↵

4. 如果一个名为v的变量的类型是T，我们称"v具有类型T"↵
